

Errata Sheet

During the production of a book, there are many inspections made. In spite of this, it is not uncommon for errors to be discovered after the book has gone to press. When this occurs, it is common trade practice to issue an Errata Sheet such as this one. We regret the need to do so and apologise to the reader.

The following chart replaces the incorrect chart on page 117 or 118 (depending on the print run of the book)

Key One:	3	4	2	6	3	7
Key Two:	5	2	4	2	5	9

Smallest (BP):	3	2	2	2	3	7
Difference(MP):	2	2	2	4	2	2

Page 126 uses the term "GEBERALLY" when it intends the term "GENERALLY".

Page 216 states: On the top chart of the two page SPF shortcut (on book page 126 – the next page)...

It should simply read: On the top chart of the two page SPF shortcut (on the next page)...

On Page 44, a shift occurred that was missed, causing the wrong symbols to appear with the levels. The corrected chart is on page 3 of this Errata sheet.

Pages 219 and 220 of the book suffered a serious problem in resizing the chart which was missed because the on-screen version was perfect. That chart should have looked like this:

334100	330100	134100	130100
334104	330104	134104	130104
334120	330120	134120	130120
